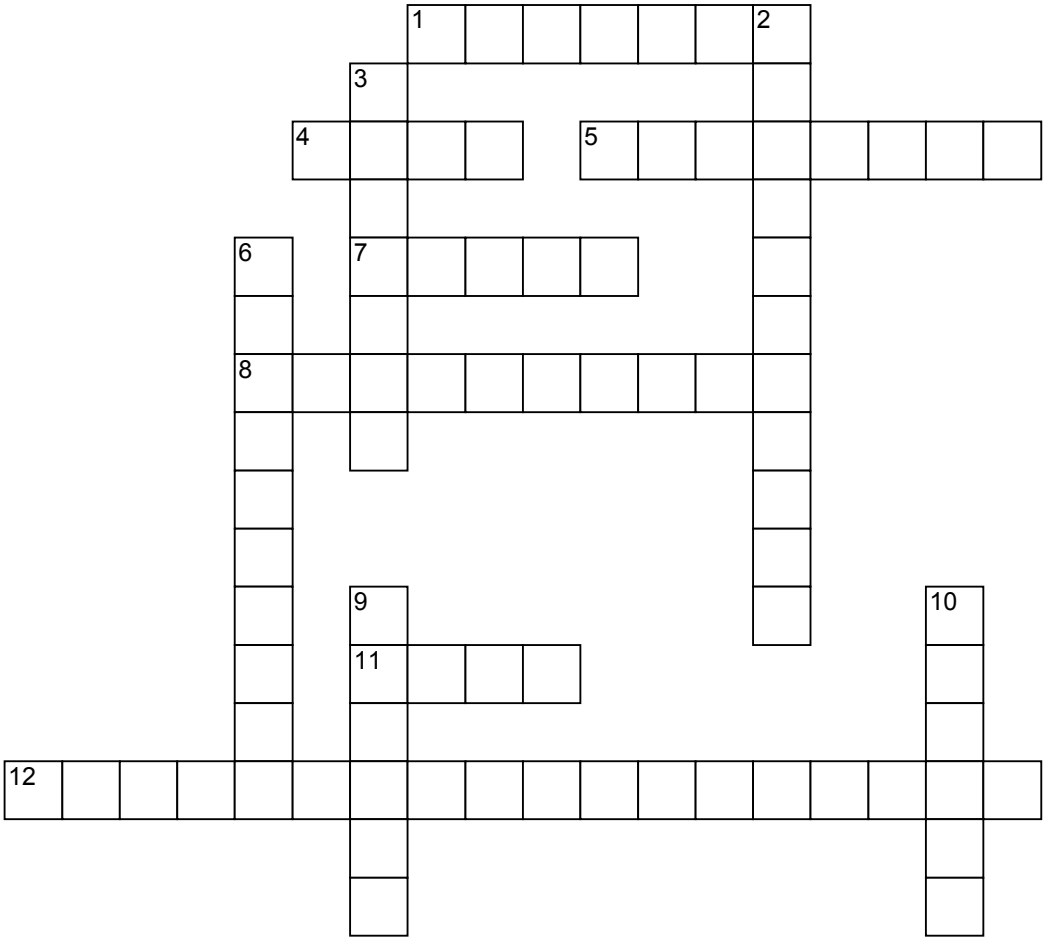
Extra – What other words do you associate with Geography?

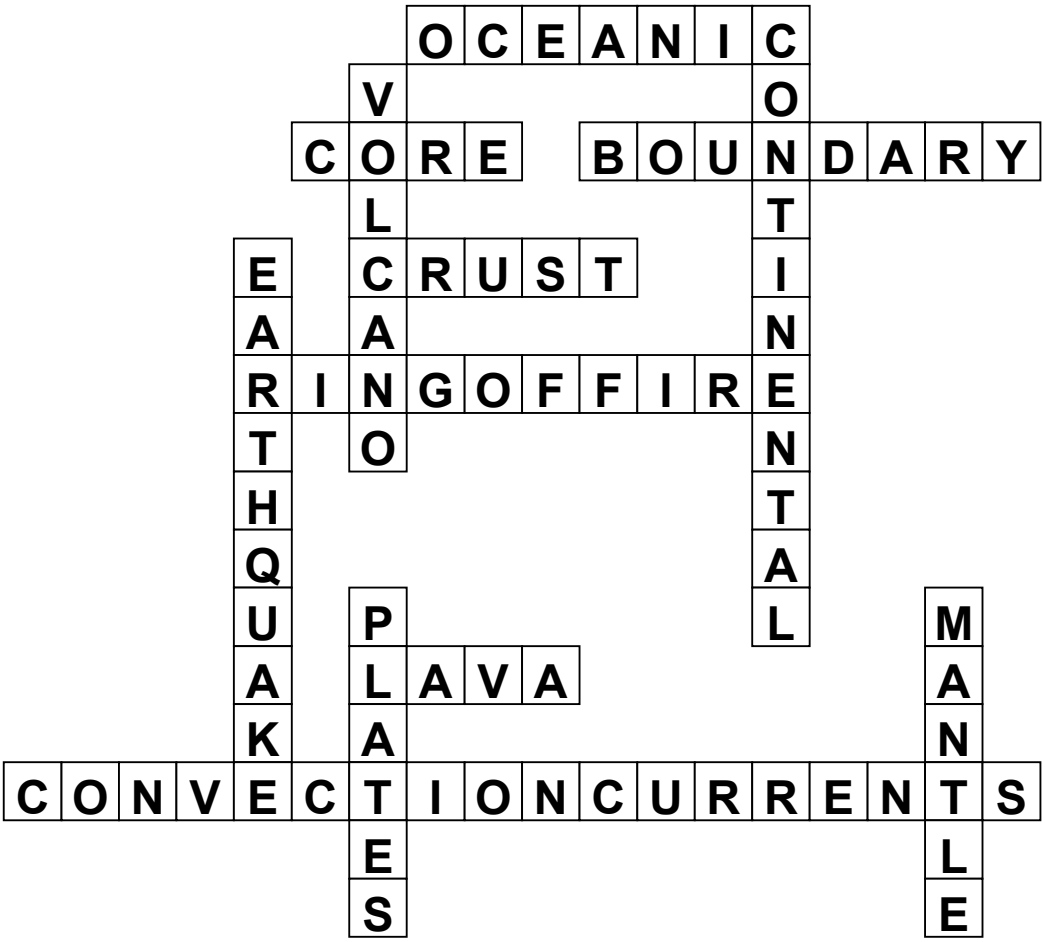
Natural Hazards



Across

1 The thin but heavier type of crust.
4 Mainly made of iron, the centre of the earth.
5 The place where two plates meet, sometimes called a fault.
7 The outermost layer of the earth.
8 The circle of volcanoes around the Pacific Ocean (three words).
11 The name for magma above ground.
12 These cause the movement of the plates (two words).

Down

2 The thicker but lighter type of crust.
3 Where liquid rock or magma shoots out or erupts through the ground.
6 The sudden vibration of the earth's crust.
9 The cracked pieces of the crust.
10 The layer below the crust, where we find magma.


Natural Hazards
